Construction Insurance

Whether you're a developer, general contractor, specialty contractor, design-build firm or construction manager, CCIG can help you with the insurance coverage and risk management expertise you need.

Construction Insurance

The construction industry is full of risks, whether we're talking about the potential for injuries, property damage, or construction defect lawsuits.

Construction is one of our specialties at CCIG, allowing us to offer you integrated risk management solutions for everything between a single job to multi-site, multi-million dollar projects.

We'll guide you through the minefield of exclusions, restrictions, and warranties that insurance companies place in their policies, making certain you are protected for the work you do now and in the future.

Risk Control & Claims Advocacy

Our Risk Management and Loss Prevention Specialists work with you to identify your exposures and offer strategic alternatives to help you avoid or transfer risk and mitigate losses. We also serve as a liaison between your company and the insurance carrier to expedite the claims process and bring claims to closure. We are your voice and your advocate.

Workers' Compensation

At CCIG, we conduct a comprehensive Workers' Comp deductible analysis to help our clients find the optimal balance between cost and coverage. By analyzing various deductible options, we identify opportunities to reduce premiums without compromising protection. This process enables our clients to make informed decisions that align with their financial goals, further showcasing our dedication to their long-term success and financial well-being.

Our solutions, including surety, are tailored by client size, contractor type, risk exposure, geographic area, and line of business.
